Datacard Group

SECURE ID AND CARD PERSONALIZATION SOLUTIONS

Datacard Group is a driving force in virtually every major card program around the world. secure ID and card personalization solutions are used to issue millions of financial cards and identification documents each day.

SP35

The Datacard® SP35 card printer delivers an unbeatable combination of high performance and low cost for low-volume card programs. It is like nothing you have seen before for issuing ID cards, gift and loyalty cards, membership cards, hotel room keys and more.

The SP35 card printer gives you fast print speeds, superb image quality and simple operation at a value price. Good looks and a compact size make the printer a welcome addition to any desktop. If you recognize how plastic cards can benefit your operation, but have been waiting for printers to come down in price, size and complexity, your moment has arrived.

SP55

The powerful Datacard® SP55 card printer offers the speed and features to meet your current requirements and the flexibility to keep pace with changes in your card program.

We integrated the power and functionality of a professional-grade card printer with the plug-and-play simplicity of a desktop printer. The result is another breakthrough in technology—the Datacard® SP55 card printer. This versatile, new printer is advanced enough to meet the demands of high-profile security programs, yet easy and affordable enough for enterprises launching their first card programs.

SP75

The Datacard® SP75 card printer delivers a powerful and unprecedented combination of advanced security and extreme reliability. It is designed to protect critical assets and enhance security in government and corporate environments. Plus, it provides the high-quality output and fast, dependable operation that colleges, universities and other cost-conscious organizations demand from a desktop card printer.

Built on the same proven platform as Datacard® SP Series card printers, the SP75 card printer is engineered for high reliability. Its design features fewer moving parts and a significantly higher duty cycle, enabling it to deliver outstanding productivity and consistent performance.

ID Works

Datacard® ID Works® identification software contains the features and functionality you need to begin an ID card program - or make your current program more successful. It gives you more power, more features, more customizability and multi-level security. And it is extremely easy to use. More important, the ID Works software platform features an innovative, modular design - an industry first for identification software. You have the freedom to choose a full package or only the individual components that meet your needs. As the next generation in secure identification software, ID Works software represents a quantum leap in ID card design and production, taking your secure ID card program to another level.
